

STATE ADMINISTRATION AND LOCAL SELF-GOVERNMENT

K. Bondarenko,

Candidate of Law Sciences,
Associate Professor at the Department of Administrative and Financial Law,
National University "Odessa Law Academy"

ON THE ISSUE OF DEFINING THE OBJECT OF STATE MANAGEMENT

State management always was and still remains the central category of the administrative law of Ukraine because the administrative law regulates legal relations in the field of the state management. Despite the great number of scientific researches of national scientists concerning the definition and the essence of the state management, its specific features, and also the subject and the object of the state management, by this day, the administrative law science have not reached the single position on those categories. To our mind, the research of the term "the object of the state management" as one of the elements of the state management is relevant today.

Making a research of the object of the state management as a special type of social management, undoubtedly, socially organized society would be

one of the elements of the object. We think that socially organized society is a static form of the society in general, and legal relations between its members would be its dynamic content, at the same time the form and the content of the society are inseparably connected elements, because the socially organized society cannot be imagined without numerous kinds of legal relations, and legal relations are impossible without the socially organized society.

On the basis of the results of research, it is possible to say that the object of the state management is a specific system which consists of the socially organized society (physical persons and their collectives, legal persons and state bodies), relations inside this society between its members, and also legal states (for example, internal security, national security).
